KEEP GREATER MILWAUKEE BEAUTIFUL

Edible Compost

Edible Compost

Objective: Learn about the layers of compost in a tasty way

Compost consists of many layers, each with an important purpose. The bottom layer is a brown layer. This is usually made of dirt and sticks.

The middle layer is a green layer, which has fruits and vegetable scraps. Lastly, the top layer is another brown layer, which is usually made of leaves.

Supplies Needed

-Small cup
-Chocolate pudding
-Chocolate chips
-M&Ms
-Gummy worms
-Oreos

Worms are also found in compost bins! They help break up the material.

Edible Compost

1. Grab your cup and place a big scoop of chocolate pudding on the bottom. This is for the bottom brown layer.

2. Next, add a layer of M&Ms and chocolate chips. These represent the green middle layer full of fruit and vegetable scraps.

3. Finally, add crushed Oreos on top to represent the top leaf layer. Add gummy worms to your compost cup and enjoy!
